Zeeco is Breaking Ground on New 200,000 SF Manufacturing Expansion

Broken Arrow, OK – May 8, 2025 – The Broken Arrow Economic Development Corporation (BAEDC) and Zeeco, Inc., a global leader in advanced combustion and environmental solutions, are proud to announce the groundbreaking of Zeeco's new 200,000-square-foot expansion at the company's Global Technology Center in Broken Arrow, Oklahoma. The groundbreaking ceremony will be held on May 8, 2025, and will feature remarks from Zeeco President and CEO Darton Zink, along with several local and state community and economic development leaders.

This major expansion will bring Zeeco's manufacturing workforce at the Global Technology Center to nearly 200 people and will add additional non-manufacturing jobs in Broken Arrow, as well. This expansion represents a significant reinvestment in the local economy and the future of manufacturing in Oklahoma. The new facility will enhance Zeeco's ability to meet growing global demand for its combustion, emissions control, and heat transfer technologies. Zeeco President and CEO, Darton Zink, says this expansion is a much-needed upgrade and will further strengthen Zeeco's global manufacturing capabilities.

"The manufacturing facility was first commissioned shortly after the founding of Zeeco in 1979. Over our 46-year history, this facility has expanded as our business has grown, but nothing like what we're doing today," said Zink. "We're bringing in advanced and state-of-the-art manufacturing equipment to modernize the facility and bring it up to the standards we've set for our other six in-house manufacturing facilities around the world."

The new manufacturing space will strengthen Broken Arrow's position as a hub for innovation and advanced manufacturing, further supporting economic growth across the region. "Zeeco's expansion reinforces Broken Arrow's reputation as a prime location for advanced manufacturing and innovation. Their continued investment in our community not only brings quality jobs but also sets the tone for future growth and collaboration in the region," Amber Miller, Vice President of Economic Development at the BAEDC, said.

Zeeco's Global Technology Center was the former site of Zeeco World Headquarters before its relocation to Tulsa, Oklahoma, in 2024. This change allowed Zeeco to reshape the purpose of its operations in Broken Arrow to one with a heavy emphasis on testing, research and development, and manufacturing. The Global Technology Center is also home to the world's largest combustion research and test facility and Zeeco's Advanced Research Complex, which serves to develop innovative products and solutions for global customers through industrial-scale pilot plants. James Bell, President & CEO of the BAEDC and Broken Arrow Chamber of Commerce, believes Zeeco's continued operations and growth in the City of Broken Arrow are a testament to how local governments and private organizations can work together to support their community.
